# Course description

This course provides a comprehensive introduction to the field of Data Science, covering the essential concepts, tools, and techniques used to analyze and interpret complex data. Students will learn about data collection, cleaning, and preprocessing, as well as exploratory data analysis, statistical inference, and machine learning. The course emphasizes practical applications and includes hands-on projects using industry-standard tools such as Python, R, and SQL. By the end of the course, students will be able to turn data into actionable insights to inform decision-making processes.

# Features of the course

Course duration -30 hours

Difficulty level-Basic and intermediate

Video lessons -modules, concepts, lessons

Contain quizzes-Assignment, Resources
